

AMAZING EXTRUSION EQUIPMENT UNIQUELY CREATED

As a middle-sized supplier for aluminium extrusion factories we understand ourselves as problem solver for extraordinary requirements and equipment far from off-the-shelf solutions. Our many years of experience in designing and constructing special machines have enabled us to accrue a diverse selection of new systems and machines for the extrusion industry.

VARIETY OF INDIVIDUAL SOLUTIONS

Thanks to our flexible approach we will find the perfect and unique realization for every project. With our individual and well-thought out solutions for almost every step in the production process we ensure highest precision and efficiency. These principles are guiding and crucial factors for us.

In the die shop:

- Dismantling Press
- Baff Shear
- Tool Gripper
- Complete Tool Handling

Before the extrusion press:

- Log Storage
- Log Saw
- Log Shear
- Billet Loader

After the extrusion press:

- Double Puller with Flying Saw
- Single Puller with Flying Saw
- Flying Profile Sample Saw
- Intensive Cooling
- Runout Roller Table
- Pincer System

After the final saw:

- Profile Stacker
- Profile Packing
